

# ServiceNow Employee Onboarding Automation Notes

## Steps

1. Open **App Engine Studio (Builder)**.
2. Click **Create New Application**.
3. Create an application named "**Employee Onboarding Automation**".

### CREATE APP

## Let's get started on your new app.

Add a name and description that define the purpose of your app. You can also add a thumbnail image.

Name \* ⓘ

Employee Onboarding Automation

Description ⓘ

Employee onboarding Request that Hr can use to submi...

Scope \* ⓘ

☒ Scoped

☐ Global

full access to the application

- Complete the application creation process.
- Create the necessary files.
- Review the application status.
- Click **Continue** on the table setup screen.

## CREATE APP

### Sit tight while we create this app

This may take a few minutes...

1. Create a file

## CREATE APP

### Great! Let's add more to your app.

You can increase your app's functionality by adding data, experiences, automation, or security. Go to the app dashboard to add them before submitting this app to your administrator for review.

[View app details](#)

[Create file](#)

2. Application status

## Create Table

- Choose **Create Table**.
- Select an **Extensible Table**.
- Search for and select **Task** as the parent table.
- Configure permissions for the table based on project requirements.

### Create File

# Phase 2 – Flow Designer

## Business Requirement

When HR submits an employee onboarding request:

1. A new request is submitted.
2. The status changes to **Pending Approval**.
3. The request is sent for **Manager Approval**.

If Approved:

- Update the status to **In Progress**.
- Create an HR task.
- Create an IT task.

If Rejected:

- Update the status to **Rejected**.

## Create the Flow

1. Open **Flow Designer** from the Application Navigator.
2. Click **Create New Flow**.
3. Create a trigger:
  - Trigger Type: **Record**
  - When to Run: **Created**
  - Select the appropriate table.
4. Add an **Update Record** action.
5. Use Data Pills to update the required fields and values.
6. Save the flow.

# Flow Completed So Far

The current flow performs the following actions:

- Request Created
- Status Updated to Pending Approval
- Ask for Approval
- If Approved:
  - Create Tasks
  - Send Email Notifications

# Employee Onboarding Approval & rejection Flow

## Flow Logic

Request Created → Pending Approval → Ask for Approval

If Approved:

- Update Status to Approved.
- Create Tasks.
- Send Email Notification.

If Rejected:

- Update Status to Rejected.
- Send Rejection Email.

## Steps

1. Open the flow.
2. Add an **Update Record** action.
3. Configure the **Ask for Approval** action.
4. Define the approval conditions.
5. If the manager approves:
  - Add the **Approved (True)** branch.
  - Create tasks using **Create Record** actions.
  - Add a **Send Email** action.
6. In the **Else** branch:
  - Update the record status to **Rejected**.
  - Send a rejection email.
7. Activate and test the flow.
8. Verify the email from the Outbound Email list.

## 1. Ask for approval

This screenshot shows the configuration for the 'Ask For Approval' action. The 'Action' dropdown is set to 'Ask For Approval'. Under 'Action Inputs', the 'Record' is 'T.. Employee Onboarding R...', the 'Table' is 'Employee Onboarding Request [...]', the 'Approval Reason' is 'Manager approval required for employee onboarding request', the 'Approval Field' is 'Manager', and the 'Journal Field' is 'Approval history'. There is a button to 'Add another OR rule set'. The 'Rules' section shows 'Approve' as the action, with the condition 'Anyone approves' and a 'When' field. The 'Due Date' is set to 'None'.

## 2. If manager is approved

This screenshot shows the configuration for an 'If' condition. The 'Condition Label' is 'Manager approval check'. The 'Condition 1' is '2 - Ask For Ap... Approval St...' with the value 'is' and 'Approved'. There are buttons for 'or' and 'and' to add more conditions. A button 'Add another condition set(OR)' is also present. At the bottom, there are 'Delete', 'Cancel', and 'Done' buttons.

## 3. Add an action approved(true) branch

This screenshot shows the configuration for the 'Update Record' action. The 'Action' dropdown is set to 'Update Record'. Under 'Action Inputs', the 'Record' is 'T.. Employee Onboarding R...', the 'Table' is 'Employee Onboarding Request [...]', and the 'Status' field is set to 'Approved'. There is a button to '+ Add field value'.

Body

Hello,

Your onboarding request has benn approved sucessfully.  
the on bosrding process has started and required task have been created.

Thank you.

6. Else

7. Update record

The screenshot shows a configuration window titled "Update Employee Onboarding Request Record". Under "Action Properties", the "Action" is set to "Update Record". Under "Action Inputs", there are three fields: "\* Record" set to "T... Employee Onboarding R...", "\* Table" set to "Employee Onboarding Request [...]", and "\* Fields" with "Status" set to "Rejected". A "+ Add field value" button is also present. At the bottom right are "Delete", "Cancel", and "Done" buttons.

8. Rejected Email

The screenshot shows an email configuration window. Fields include: "Target Record" set to "T... Employee Onboarding R...", "Table" set to "Employee Onboarding Request [...]", "Include Watermark" checked, "\* To" set to "Trigger - ... Employee ...", "CC" and "BCC" empty, and "\* Subject" set to "Employee onboarding request". Below these is a rich text editor with a toolbar (undo, redo, bold, italic, text color, background color, link, unlink, source code) and a font dropdown set to "OpenSans.So..." and "10pt". The "Body" text reads: "Hello, your on boarding request has been rejected by the manager. please contact HR for futher details. Thank you."
